INTRODUCTION

The state Odisha has made rapid and significant improvements in their HMIS, including strengthening the extent and quality of data coverage. This report firstly seeks to summarize key findings and key flags for service delivery performance, and also identify key areas for further strengthening. It provides information for strengthening evidence based decision making, and supporting practical action based on the information. The state has a database of all facility wise data, which allows analyzing for more detailed information and drilling down to health facilities. This report is a step in this direction of strengthening and institutionalizing analysis and feedback processes among the districts of Odisha. It has three main sections namely service delivery performance, health facilities performance and access to health care among the districts of Odisha.

Service delivery performance looks into continuum of care across life stages from pregnancy care, child birth, PNC & Newborn care and Reproductive age group and in specific district wise percentage of service delivery compared with state's average for scoring and ranking of districts based on the performance. Districts are looked for institutional deliveries also home deliveries by trained birth attendants, timely antenatal services etc and drilled down to health facility level (CHC, PHC, SC) wherever needed.

The report aims at more intensive utilization of existing rural health infrastructure and seeks to identify the facilities which are not provided services based on reported facility wise data from Apr to Oct 2013 for each district of Odisha. The number of SCs, PHCs and CHCs which are not provided ANC, delivery, PNC, Newborn, Child Immunisation and FP services district wise for Odisha are listed and scored.

To identify gaps and dropouts among the districts of Odisha and a step forward to overcome social or geographical barriers to access, the report has assessed the districts health care access based on 7 key indicators which are referred from HMIS resource person's manual. The identified districts needs intervention for improving access to health care and the state can act upon so as to deliver full package of services to these areas which is much needed.

The service delivery performance of districts is assessed based on 16 Key indicators from HMIS based dashboard monitoring system. The health facilities performance is scored based on 41 indicators to identify the % of facilities not providing services like ANC, delivery, PNC, Newborn etc for SCs, PHCs and CHs for all districts of Odisha. The districts are scored for access to health care based on 7 key indicators. Each section has scored and ranking of districts has done based on Z-score.

CONCEPTUAL FRAMEWORK

ANALYSIS REQUIREMENTS FROM STATE

Districts ranking with indicators to assess health facilities, service delivery and functional delivery points

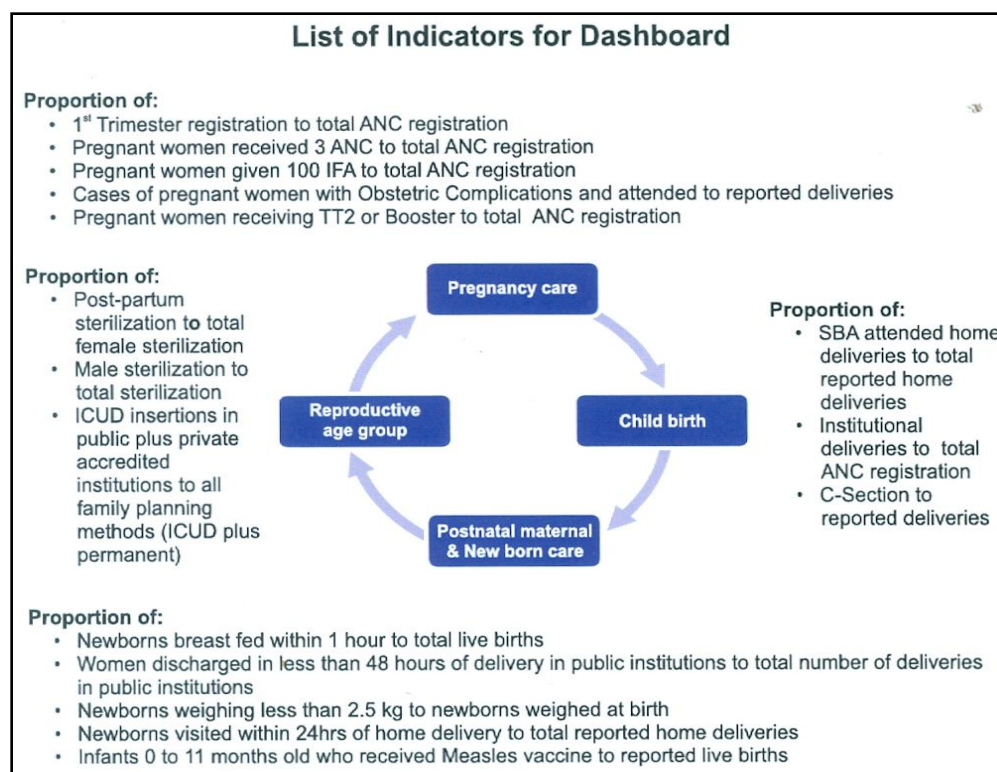

1. District wise - No of facilities providing birth immunization
2. District wise - No of facilities providing Family planning service
3. District wise - No of facilities providing CS service
4. District wise - % PW staying > 48 hr after delivery
5. District wise - % of Sub center conducting delivery
6. District wise - % of PHC conducting delivery
7. District wise - % of Sub center conducting delivery
8. District wise - % facility maintaining delivery status as per norm
9. District wise -No of Delivery Points with functional NBCC (As on 30.7.2013)
10. District wise -% Post partum sterilization out of total sterilization
11. District wise -% male sterilization
12. District wise -% JSY payment out of total delivery etc.

SERVICE DELIVERY

STRATEGIC RMNCH+A INTERVENTIONS ACROSS LIFE STAGES

The overview of the key RMNCH+A interventions as a 'continuum of care' is provided in different life stages as shown in the figure below. There are set of interventions at these stages are shown to have high impact on reducing mortality and improving survival, and most of them have been part of the previous phase of NRHM. The effectiveness of these interventions is determined by the coverage achieved among the affected fraction of population as also the availability, accessibility, actual utilization of services and quality of service delivered. Therefore, it is important that 'Bottleneck Analysis' be carried out at various levels of planning, including the state and district level in order to prioritize attention to address specific gaps in the delivery of a particular intervention or set of interventions.

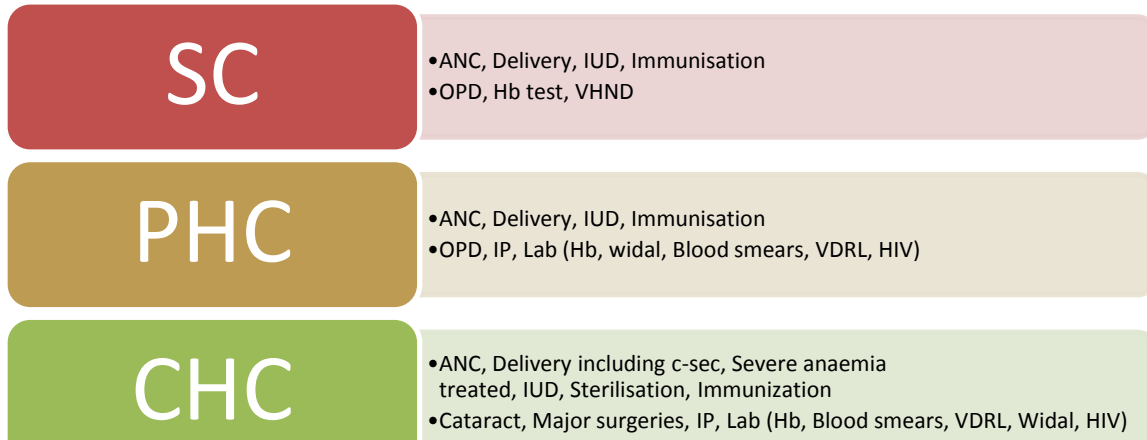

Source: A Strategic Approach to Reproductive, Maternal, Newborn, Child and Adolescent Health (RMNCH +A) in India, MOHFW (GOI)

The Indicators to assess the service delivery for districts of Odisha are listed under chapter named Indicators. Please refer the chapter for more details.

HEALTH FACILITIES PERFORMANCE

In Odisha health facility type wise performance has assessed for SCs, PHCs and CHCs district wise. For SCs, the percentage of facilities providing ANC, delivery, Immunization, FP, lab, OPD and VHND and identified the percentage of SCs not reported these services district wise for Odisha from Apr to Oct 2013. For PHCs, the percentage of facilities providing all the services provided by SCs plus IPD and identified the percentage of PHCs not providing the services district wise for Odisha. Similarly for CHCs, Cataract operation, Major surgeries, severe anemia treated plus all the services provided by PHCs are considered and identified the percentage of CHCs not reported for each service by indicators. The list of indicators for SCs, PHCs and CHCs to measure the health facilities performance are listed under chapter Indicators. Please refer the Indicators chapter to know more.

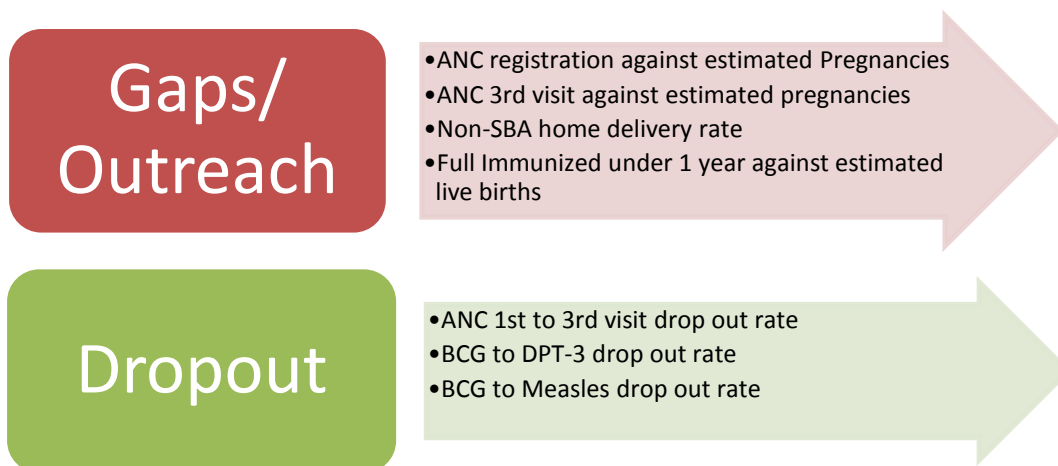

Facilities not reported for providing services can be any of the following

1. Beneficiaries/ Patients (no case during the month)
2. Infrastructure (facilities/amenities not available or not working condition)
3. Human Resources (Health provider/ MO not available/ Lack of staff)
4. Inadequate training

ACCESS TO HEALTH CARE

Understanding Access to Health care: especially the public health system: This has implications for development of new facilities, for planning health education to communities, planning efforts to overcome social or geographic barriers to access. It may also indicate the need to improve functioning of health facilities in that area. Where there is potential universal access as evidenced by even one antenatal check up or one immunization dose, the reasons for the inability to deliver the full package of services with necessary quality must be identified and acted upon. Decline in reach is also a good indicator of access like dropout rates.

METHODOLOGY

HMIS BASED DASHBOARD MONITORING SYSTEM

Score card for 16 Indicators to assess service delivery based on life cycle approach.

Source: A Strategic Approach to Reproductive, Maternal, Newborn, Child and Adolescent Health (RMNCH +A) in India, MOHFW (GOI)

- Odisha state's average for each indicator for each district is taken as the reference point.
- Districts score is determined based on the state's average.
- All the indicator scores for each district will be consolidated as district score.
- All indicators have the same weightage.
- Districts have been classified into four categories based on the indicator scores (based on four quartiles).
- Positive scores from 1 to 4 for those above the State's average (for positive indicators) and for those below the State's average (for negative indicators).
- Negative scores -1 to -4 for those below State's average (for positive indicators) and for those above State's average (for negative indicators).
- Each district has to be looked for aggregated score for each indicator group.
- Z-score is calculated from the total score for each district.
- Based on the Z-score, each district will have rank from 30 to 1.

As a result, districts ranking for service delivery, health facilities performance and health care access are calculated for each domain. Also overall scoring and ranking of districts based on 16 indicators for service delivery, 41 indicators for health facilities performance and 7 indicators for health care access.

Data source: DHIS2 NRHM Odisha

Period of Analysis: Apr to Oct 2013

Tools used: DHIS2 (Data Analyser, Data Visualizer, Pivot table, GIS) Version 2.12

INDICATORS & SCORING			
Domains	Indicators	Max Score	Min Score
Service Delivery	16	+4	-4
Health Facilities Performance	41	+4	-4
SCs	8		
PHCs	15		
CHCs	18		
Health Care Access	7	+4	-4
Total	64		

INDICATORS

TO ASSESS SERVICE DELIVERY

16 KEY INDICATORS TO ASSESS SERVICE DELIVERY			
A	PREGNANCY CARE	C	POSTNATAL MATERNAL & NEWBORN CARE
1	ANC Registration in 1 st Trimester Rate	9	% Women Discharged under 48 hours Rate
2	ANC 3 rd Visit Coverage Rate	10	% Home Delivery Newborn Visit Rate
3	ANC 100 IFA Coverage Rate	11	% Newborn Weight Less than 2500 gms
4	ANC TT2/ Booster Coverage Rate	12	% Newborn Breastfed within 1 hour Rate
5	Complicated Pregnancies Attended Rate	13	% Full Immunized under 1 year against live birth
B	CHILD BIRTH	D	REPRODUCTIVE AGE GROUP
6	% SBA Delivery to Total Home Delivery	14	% Post-partum Sterilization to Total Female Sterilization
7	% Institutional Delivery to Total ANC Registration	15	% Male Sterilization to Total Sterilization
8	% Caesarean section to Total Institutional Deliveries	16	% IUCD against Total FP (Sterilization + IUCD)

To ASSESS HEALTH FACILITIES PERFORMANCE

8 KEY INDICATORS TO ASSESS HEALTH FACILITY PERFORMANCE (SC)			
A	ANTENATAL NATAL CARE (ANC)	E	LAB
1	% Sub-Centres not reported ANC Registration	6	% Sub-Centres not reported Hb tested
2	% Sub-Centres not reported ANC Hypertension new case	F	OPD
B	DELIVERY	7	% Sub-Centres not reported OPD attendance
3	% Sub-Centres not conducting deliveries	G	VHND
C	IMMUNIZATION	8	% Sub-Centres not reported VHND
4	% Sub-Centres not reported DPT-3 dose given under 1 year		
D	FAMILY PLANNING		
5	% Sub-Centres not reported IUD insertion		

15 KEY INDICATORS TO ASSESS HEALTH FACILITY PERFORMANCE (PHC)			
A	ANTENATAL NATAL CARE (ANC)	E	LAB
1	% PHCs not reported ANC Registration	9	% PHCs not reported Hb tested
2	% PHCs not reported ANC Hypertension new case	10	% PHCs not reported blood smears examined
B	DELIVERY	11	% PHCs not reported widal tests conducted
3	% PHCs not conducting deliveries	12	% PHCs not reported VDRL tests conducted
4	% PHCs not attended complicated pregnancies	13	% PHCs not reported HIV tests conducted
C	IMMUNIZATION	F	OPD
5	% PHCs not reported DPT-3 dose given under 1 year	14	% PHCs not reported OPD attendance
6	% PHCs not reported live births weighing	G	IP
D	FAMILY PLANNING	15	% PHCs not reported IP admissions
7	% PHCs not reported IUD insertion		
8	% PHCs not reported sterilization		

18 KEY INDICATORS TO ASSESS HEALTH FACILITY PERFORMANCE (CHC)			
A	ANTENATAL NATAL CARE (ANC)	E	LAB
1	% CHCs not reported ANC Registration	11	% CHCs not reported Hb tested
2	% CHCs not reported ANC Hypertension new case	12	% CHCs not reported blood smears examined
B	DELIVERY	13	% CHCs not reported widal tests conducted
3	% CHCs not conducting deliveries	14	% CHCs not reported VDRL tests conducted
4	% CHCs not attended complicated pregnancies	15	% CHCs not reported HIV tests conducted
5	% CHCs not reported caesarean section	F	Cataract
6	% CHCs not reported severe anemia treated	16	% CHCs not reported cataract operation
C	IMMUNIZATION	G	Major Operation
7	% CHCs not reported DPT-3 dose given under 1 year	17	% CHCs not reported major surgeries
8	% CHCs not reported live births weighing	H	IP
D	FAMILY PLANNING	18	% CHCs not reported IP admissions
9	% CHCs not reported IUD insertion		
10	% CHCs not reported sterilization		

To Assess Health Care Access

7 KEY INDICATORS TO HEALTH CARE ACCESS			
A	PREGNANCY CARE	C	CHILD IMMUNIZATION
1	ANC Registration against estimated pregnancies	5	BCG to DPT-3 drop out rate
2	ANC 3 rd visit against estimated pregnancies	6	BCG to Measles drop out rate
3	ANC 1 st to 3 rd visit dropout rate	7	Full Immunized child under 1 year against estimated live births
B	DELIVERY		
4	% Home delivery by Non-Skilled birth attendant		

Source: HMIS Resource Persons Manual

KEY FINDINGS

ANTE-NATAL CARE SERVICES

- The Percentage of women registered for Ante-Natal Care services is 84% for Odisha.
- The percentage of pregnant women registered within 1st trimester for Odisha is 51%.
- The percentage of pregnant women received 100 IFA tablets for Odisha is 76% against reported ANC registrations and 64% against estimated pregnancies.
- Boudh, Sonapur, Khordha and Cuttack districts are showing very less % for ANC coverage services.
- Boudh, Sonapur, Cuttack and Khordha districts show 58, 65, 70, 71 % respectively for ANC registration against estimated pregnancies. This shows high pregnancies missed out in these districts.
- Boudh, Khordha, Sonapur and Cuttack districts show 52, 56, 62 and 64 % respectively for ANC third visit coverage rate from Apr to Oct 2013.
- The percentage of pregnant women received 3 ANC is estimated as 74 for Odisha.
- The percentage of pregnant women received ANC TT2/ Booster dose is estimated as 77 for Odisha.
- Boudh and Sonapur districts show 37% and 40% for ANC 100 IFA coverage rate against estimated pregnancies.
- 10% of all deliveries are reported as complicated pregnancies in Odisha.

DELIVERY CARE

- 10% of home deliveries are reported as delivery conducted by Skilled Birth Attendants (SBA)
- 10% of Institutional deliveries are reported as caesarean section in Odisha.
- The percentage of institutional deliveries against total ANC registration for Odisha is 77.
- The percentage of deliveries discharged less than 48 hrs for Odisha is 63.
- In Sambalpur district, only 13% of deliveries are discharged within 48 hrs and it shows good practice.

POST-NATAL CARE & NEWBORN CARE

- The percentage of newborns breastfed within 1 hr rate for Odisha is 94%.

- Kendrapara district shows 72% for Newborns breastfed within 1 hr rate and this is because Kendrapara DHH shows very less percentage. This may be either reporting issues or actual less % are breastfed.
- 70% of home deliveries are reported to have newborn visited within 24 hours for Odisha.
- The percentage of babies weighed less than 2.5 kgs for Odisha is 17.
- The Percentage of full immunized child under 1 year against estimated live births for Odisha is 80.

FAMILY PLANNING SERVICES

- The Percentage of Post-partum sterilization against total female sterilization is 11 for Odisha.
- 2% of total sterilization is conducted on males for Odisha.
- The percentage of IUCD against all FP methods including permanent plus IUCD for Odisha is 64.

KEY FLAGS

ANTE-NATAL CARE SERVICES

- Nearly 16% of pregnant women are estimated to not have availed Ante-Natal Care services in Odisha.
- Most of the deliveries in Kasinagar CHC of Gajapati districts are reported as complicated pregnancies. It needs to be enquired whether they are all complicated pregnancies or reporting issues.
- VSSMC Burla of Sambalpur districts has not reported any complicated pregnancies attended from Apr to Oct 2013.

DELIVERY CARE

- Jajapur, Kendujhar, Mayurbhanj, Nabarangapur and Sambalpur districts shows less % for SBA delivery to total home delivery.
- Gajapati district shows 52% institutional deliveries against total ANC registered and when we refer ANC registration against estimated pregnancies, it shows 104 % and it implies that there is more % of unreported deliveries in Gajapati.

- Angul district shows only 2% for caesarean section delivery rate and the state's average is 10%.
- Sambalpur district shows 20% for caesarean section delivery rate and state's average is only 10%.
- 92% of institutional deliveries are discharged under 48 hrs of delivery in Boudh district.

POST-NATAL CARE & NEWBORN CARE

- 30% of Home deliveries in Odisha have not reported to have newborn visited within 24 hours of delivery.
- Jajapur district shows only 43% of home deliveries where newborn visited within 24 hours. Blocks of Jajapur districts shows very less percentage for home delivery newborn visited within 24 hrs rates.
- Khandamal district shows 26% for low birth weight babies (less than 2.5 kgs) and SCs of Daringibadi Block has reported more LBW babies and this may be due to reporting issues.
- Boudh, Sonapur, Koraput, Khordha and Cuttack districts shows 63, 67, 70, 71 and 72 % respectively for full immunized child less than 1 year against estimated live births.

FAMILY PLANNING SERVICES

- Boudh, Cuttack and Puri districts shows very less post-partum sterilization against total female sterilization.
- 18 districts showing less than 1% for Male sterilization against total sterilization.
- Malkangiri, Gajapati, Sonapur and Rayagada districts show only 41, 44, 45 and 49% respectively for IUCD against total FP methods including permanent plus IUCD.

SERVICE DELIVERY PERFORMANCE

ANC REGISTRATION WITHIN 1ST TRIMESTER RATE

The State shows 51% for ANC registration within 1st trimester rate for 2013. Sonapur, Debagarh, Jharsuguda and Ganjam districts show 19, 28, 28 and 30 and when we drill down to Sonapur districts, Dunguripalli Block shows very less % for ANC registration in 1st trimester rate.

DRILL DOWN TO HEALTH FACILITIES OF SONAPUR DISTRICT

ANC registration in 1st trimester rate

■ ANC in first trimester (Early registration)

Blocks of Sonapur District

Sub-Centres reported zero ANC registered within 1st trimester (Apr – Oct 2013)

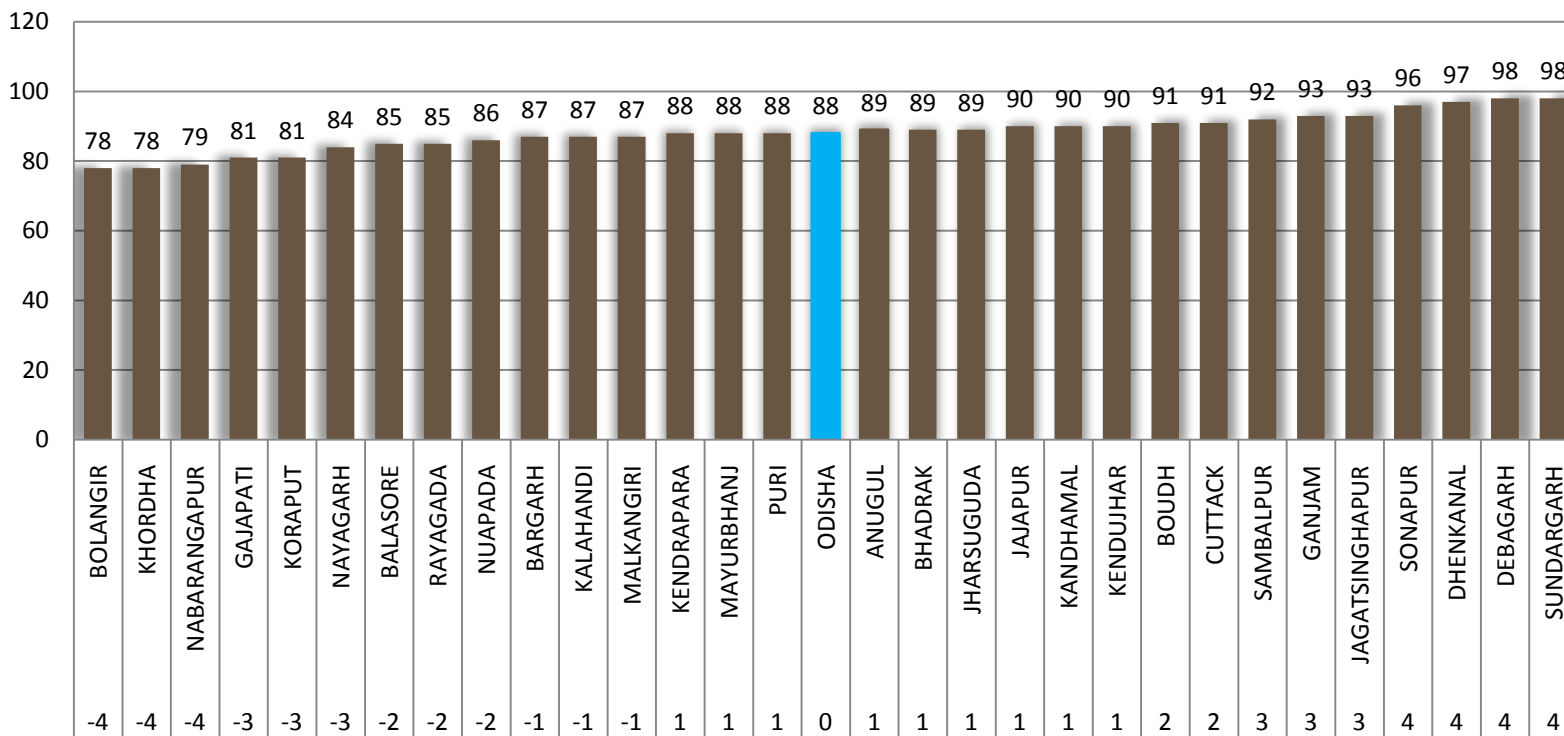

2013	Apr		May		Jun		Jul		Aug		Sep		Oct	
	ANC Reg	ANC 1st trim	ANC Reg	ANC 1st trim	ANC Reg	ANC 1st trim	ANC Reg	ANC 1st trim	ANC Reg	ANC 1st trim	ANC Reg	ANC 1st trim	ANC Reg	ANC 1st trim

ANC 100 IFA COVERAGE RATE

Bolangir, Sonapur, Boudh districts show 56, 61 and 64 % respectively for ANC 100 IFA coverage rate from Apr to Oct 2013.

ANC THIRD VISIT COVERAGE RATE

Districts of Odisha show high % for ANC third visit coverage rate from Apr to Oct 2013 when calculated against reported pregnancies registered. For more detailed information for ANC coverage against estimated pregnancies, the picture complete shows different scenario which has shown in Discussion.

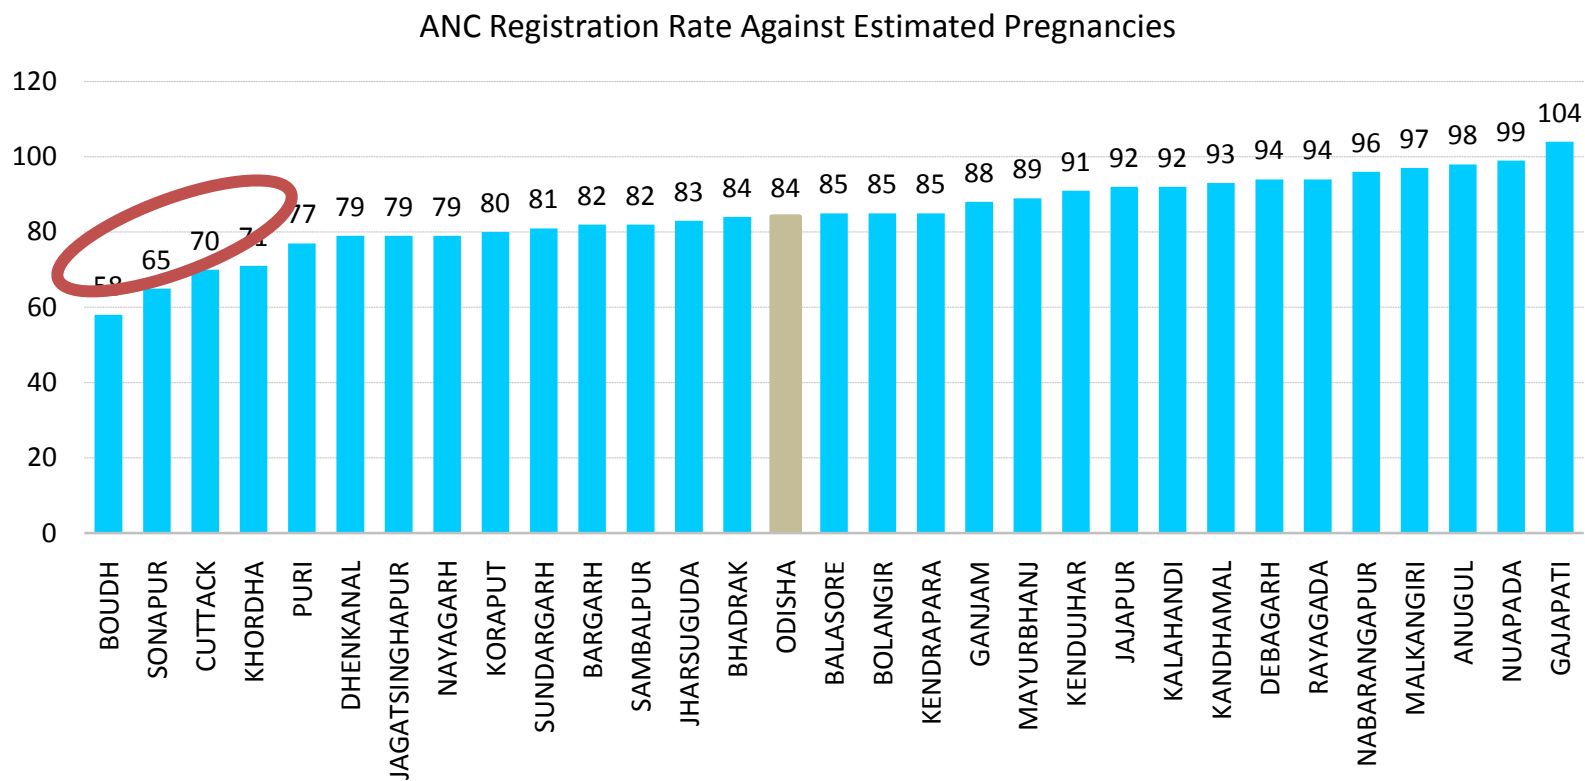

ANC TT2/ BOOSTER COVERAGE RATE

All the districts of Odisha shows high % for ANC third visit coverage rate, ANC TT2/ Booster coverage rate when against reported pregnancies registered. To look into more detailed for these coverage rates, the indicator denominator reference has changed for estimated pregnancies from Apr to Oct for all the districts and the information gives us clear picture of ANC coverage rate which is completely different from above as shown below under discussion.

DISCUSSION ON ANC COVERAGE

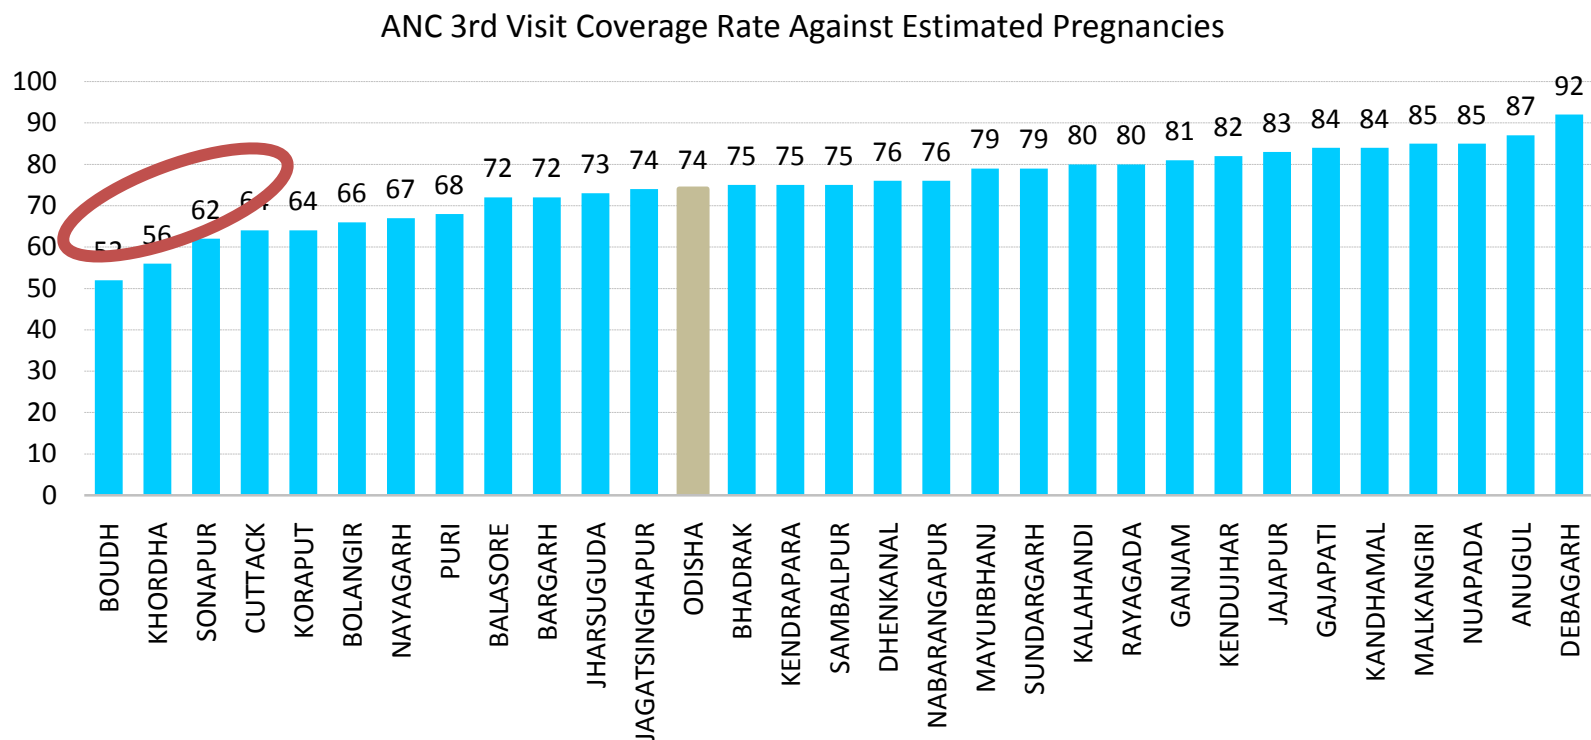

1. ANC REGISTRATION RATE AGAINST ESTIMATED PREGNANCIES

Boudh, Sonapur, Cuttack and Khordha districts show 58, 65, 70 and 71 % respectively for ANC registration against estimated pregnancies. This shows high pregnancies missed out in these districts.

DISCUSSION ON ANC COVERAGE

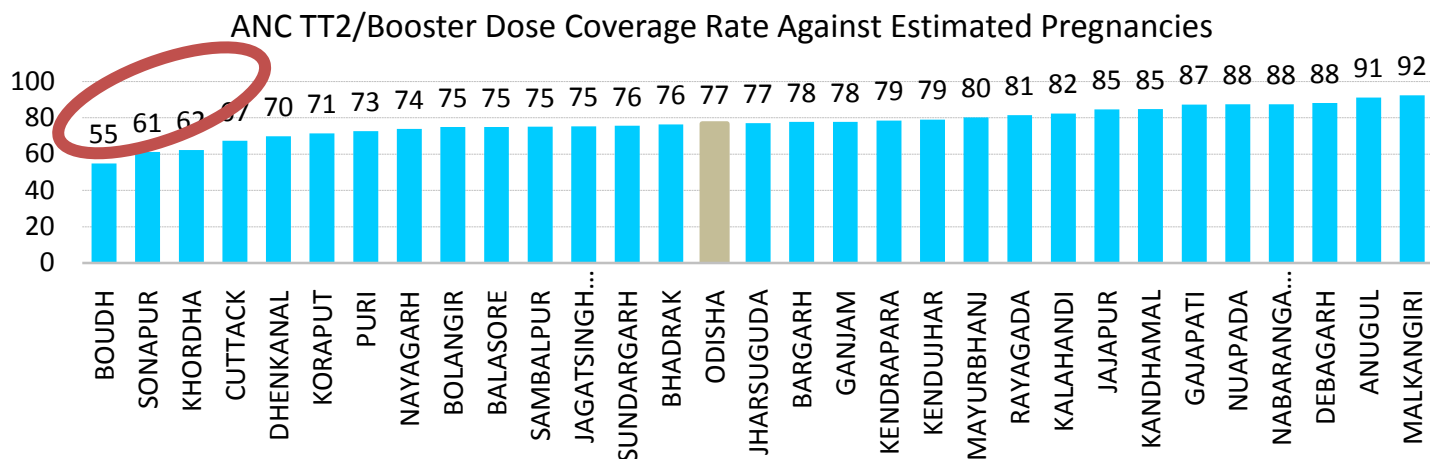

2. ANC 3RD VISIT COVERAGE RATE AGAINST ESTIMATED PREGNANCIES

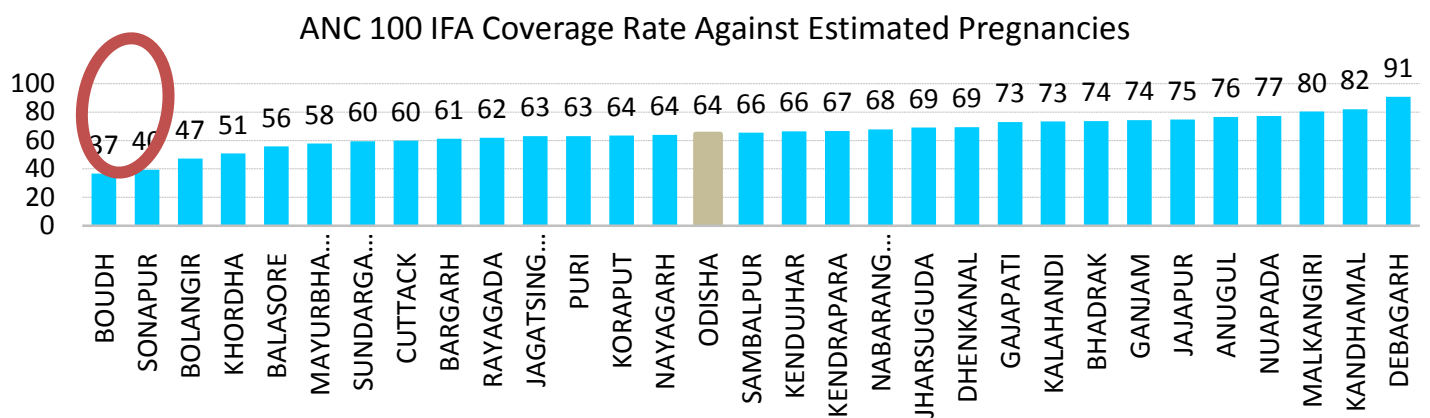

This above chart shows again the same picture as state above. Boudh, Khordha, Sonapur and Cuttack districts show 52, 56, 62 and 64 respectively for ANC third visit coverage rate from Apr to Oct 2013. These four districts are also showing poor % for ANC TT2/Booster coverage rate and these districts needs to be focused to improve coverage of ANC services for better reach of ANC so as to improve maternal health in these districts.

DISCUSSION ON ANC COVERAGE

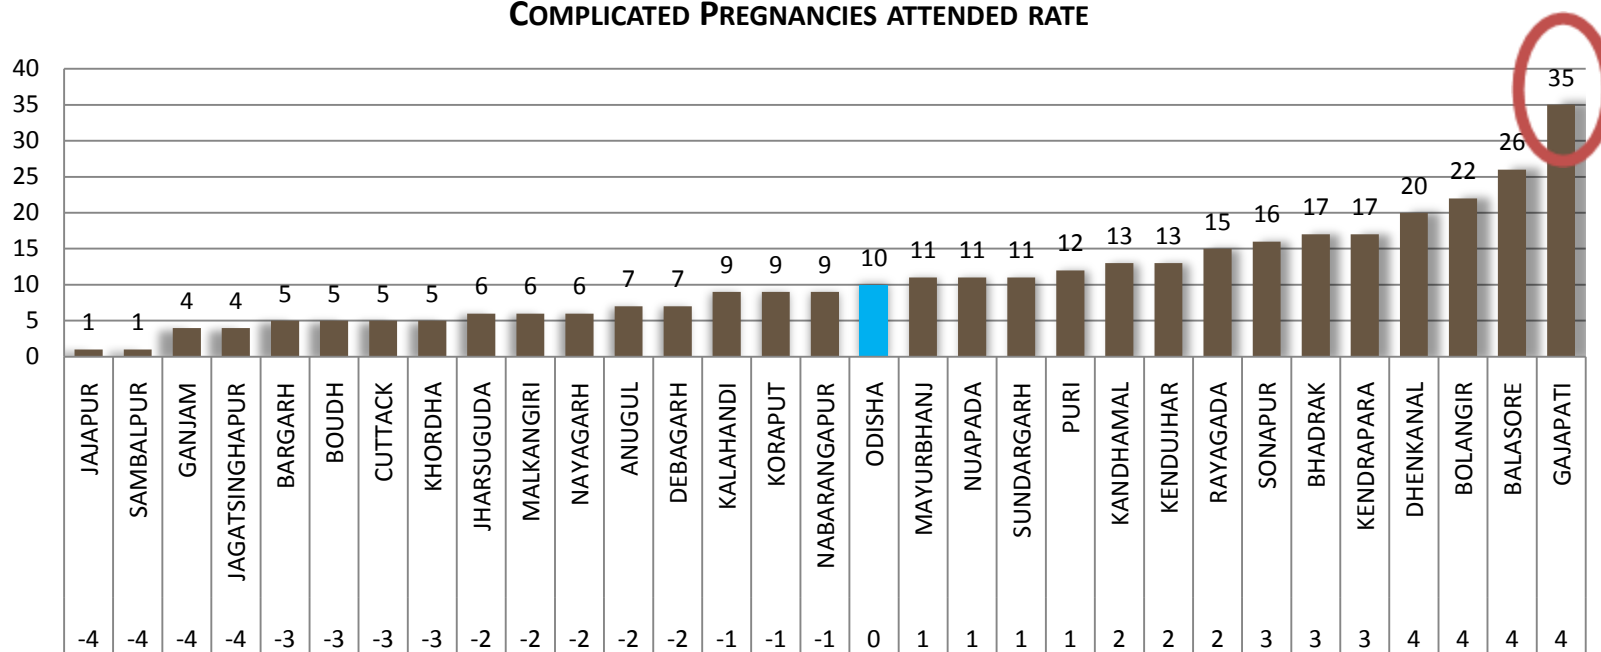

3. ANC TT2/ BOOSTER COVERAGE RATE AGAINST ESTIMATED PREGNANCIES

4. ANC 100 IFA COVERAGE RATE AGAINST ESTIMATED PREGNANCIES

COMPLICATED PREGNANCIES ATTENDED RATE

GAJAPATI	COMPLICATED PREGNANCIES ATTENDANCE RATE						
Kasinagar CHC	Apr-13	May-13	Jun-13	Jul-13	Aug-13	Sep-13	Oct-13
Complicated Pregnancies	7	33	35	38	35	53	48
Institutional Deliveries	33	34	36	39	36	53	48
%	21.2	97.1	97.2	97.4	97.2	100	100

Most of the deliveries in Kasinagar CHC of Gajapati districts are reported as complicated pregnancies. It needs to be enquired whether they are all complicated pregnancies or reporting issues.

SAMBALPUR	COMPLICATED PREGNANCIES ATTENDANCE RATE						
VSSMC-Burla	Apr-13	May-13	Jun-13	Jul-13	Aug-13	Sep-13	Oct-13
Complicated Pregnancies	0	0	0	0	0	0	0
Institutional Deliveries	404	489	509	453	503	496	464
%	0	0	0	0	0	0	0

VSSMC Burla of Sambalpur districts has not reported any complicated pregnancies attended from Apr to Oct 2013.

% SBA DELIVERY TO TOTAL HOME DELIVERY

Jajapur, Kendujhar, Mayurbhanj, Nabarangapur and Sambalpur districts shows less % for SBA delivery to total home delivery.

% INSTITUTIONAL DELIVERY AGAINST TOTAL ANC REGISTRATION

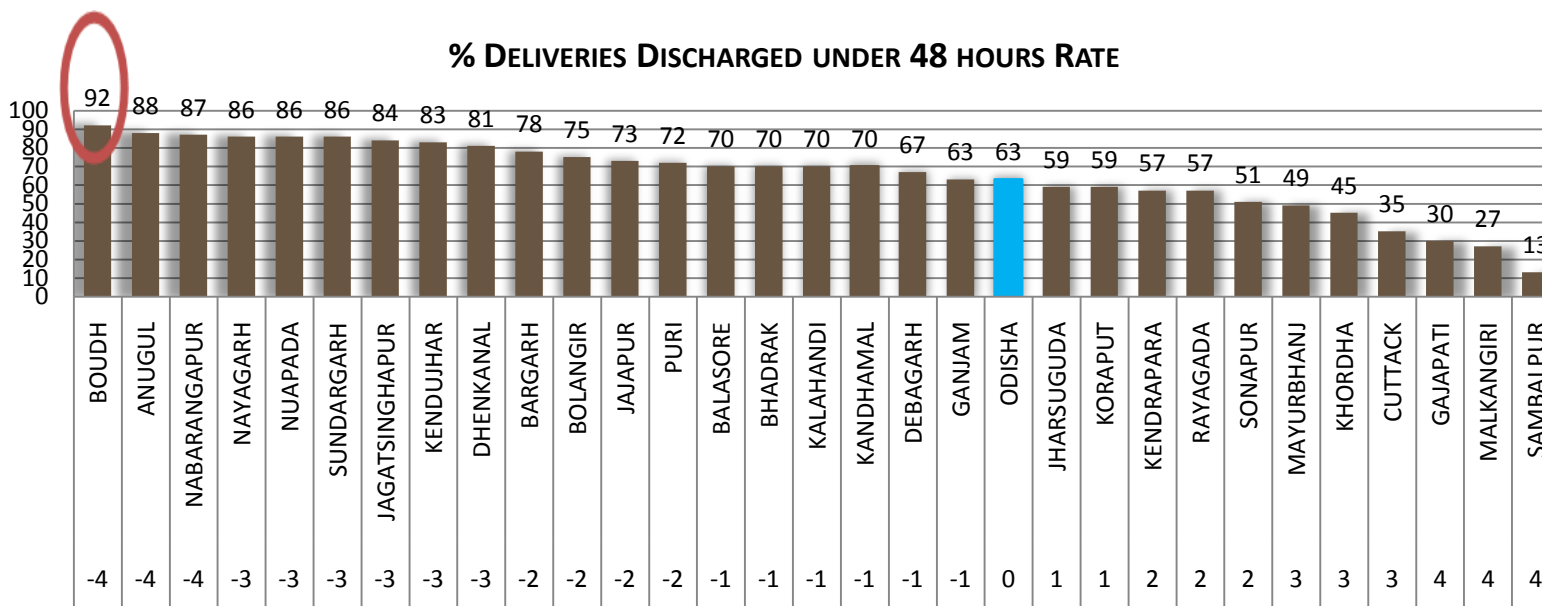

Gajapati district shows 52% institutional deliveries against total ANC registered and when we refer ANC registration against estimated pregnancies, it shows 104 % and it implies that there is more % of unreported deliveries in Gajapati. In Cuttack district, the % of institutional deliveries against total ANC registration is 147 which is higher because there are increased number of private deliveries are reported in May 2013 which is 2,815.

CAESAREAN SECTION RATE AGAINST TOTAL INSTITUTIONAL DELIVERY

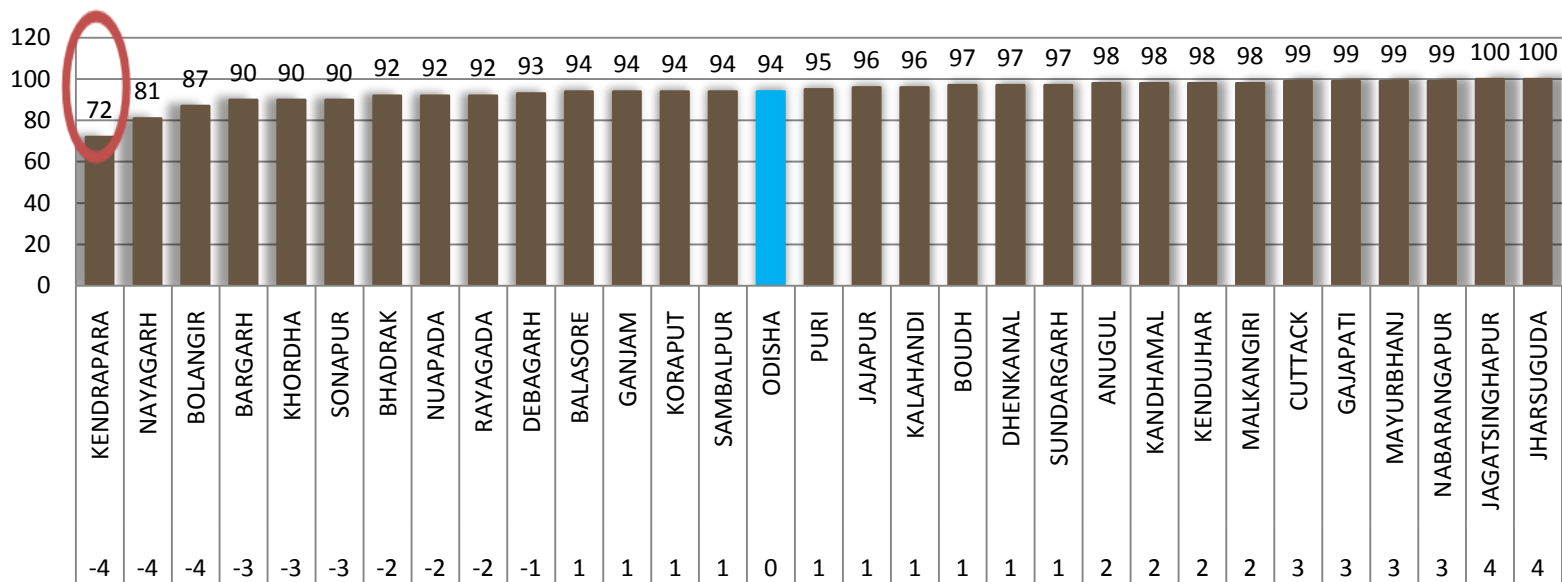

ANGUL	CAESAREAN SECTION RATE (LESS %)						
Talcher SDH	Apr-13	May-13	Jun-13	Jul-13	Aug-13	Sep-13	Oct-13
Caesarean sections	11	18	24	12	1	0	0

%	11	13	18	9	1	0	0
ANGUL DHH							
Caesarean sections	35	25	16	25	28	0	0
Institutional Deliveries	333	489	501	457	521	517	467
%	11	5	3	6	5	0	0

SAMBALPUR	CAESAREAN SECTION RATE (HIGH %)						
VSSMC-Burla	Apr-13	May-13	Jun-13	Jul-13	Aug-13	Sep-13	Oct-13
Caesarean sections	159	196	214	197	231	191	215
Institutional Deliveries	404	489	509	453	503	496	464
%	39.4	40.1	42	43.5	45.9	38.5	46.3

BOUDH	DELIVERIES DISCHARGED UNDER 48 HRS RATE						
BOUDH DHH	Apr-13	May-13	Jun-13	Jul-13	Aug-13	Sep-13	Oct-13
Deliveries discharged <48hrs	48	67	64	70	101	107	78
Total Ins deliveries	48	67	73	70	101	107	78
%	100	100	87.7	100	100	100	100

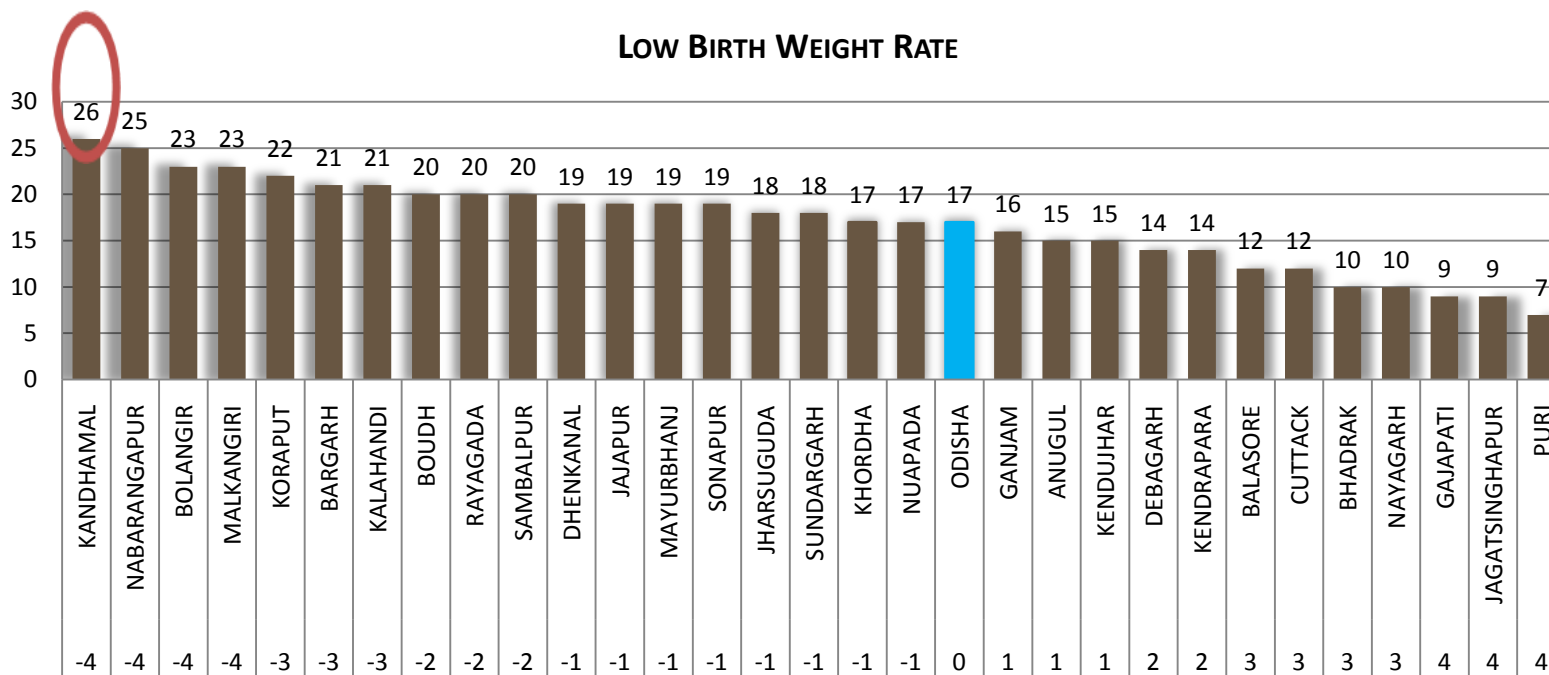

% NEWBORN BREASTFED WITHIN 1 HOUR RATE

KENDRAPARA	NEWBORN BREASTFED WITHIN 1 HR RATE						
Kendrapara DHH	Apr-13	May-13	Jun-13	Jul-13	Aug-13	Sep-13	Oct-13
Newborn breastfed within 1 hr	390	48	56	509	37	40	0
Live births	475	615	592	516	589	583	594
%	82.1	7.8	9.5	98.6	6.3	6.9	0

% HOME DELIVERY NEWBORN VISIT RATE WITHIN 24 HOURS

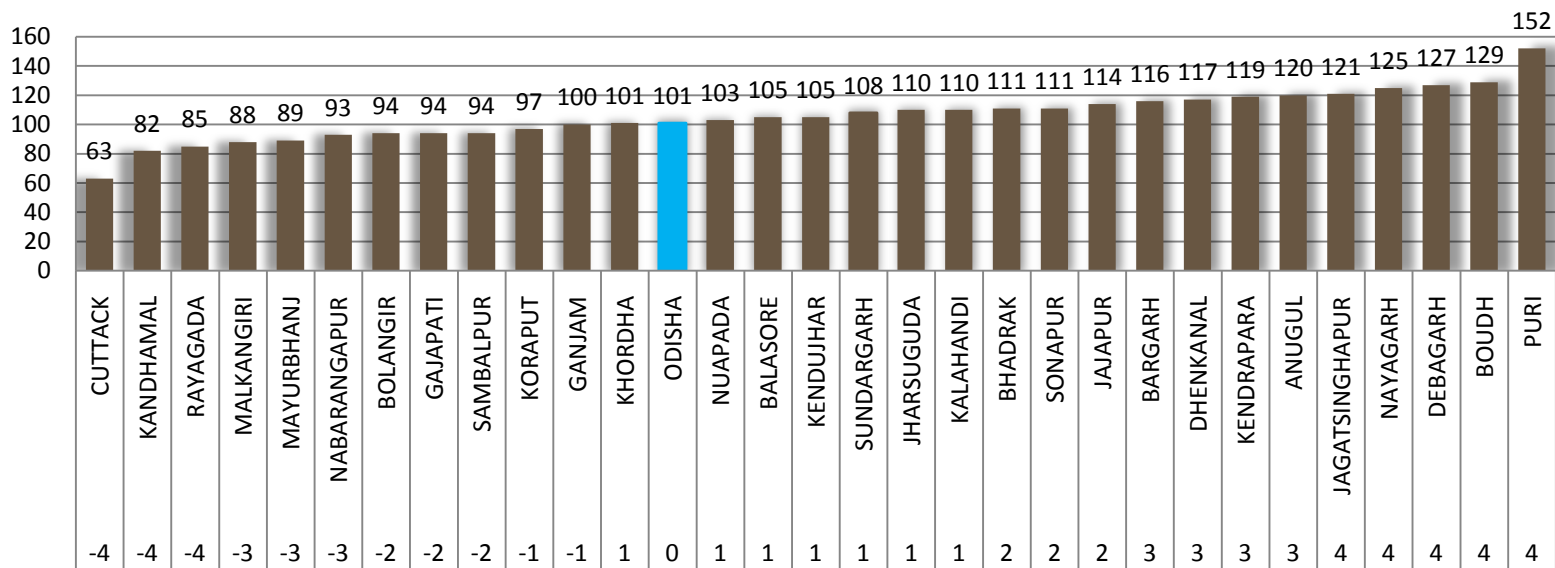

JAJAPUR	HOME DELIVERY NEWBORN VISIT RATE WITHIN 24 HOURS								
Blocks	Dharmasala Block	Dasarthpur Block	Sukinda Block	Binjharpur Block	Barachana Block	Jajpur Block	Dangadi Block	Korei Block	Rasulpur Block
Newborn visited within 24 hrs	0	3	0	1	23	5	7	0	1
Home deliveries	17	3	31	1	25	6	19	4	1
%	0	100	0	100	92	83.3	36.8	0	100

KANDHAMAL	LOW BIRTH WEIGHT RATE (DATA ENTRY ERRORS?)								
SCs of Daringibadi Block	Budaguda SC	Bamunigaon SC	Bhramar badi SC	Saramauli SC	Danekbadi SC	Sraniketa SC	Jhinjiriguda SC	Badabanga SC	Daringiba di_Mc SC
Live births Weight < 2.5 kg	16	2	8	3	7	1	3	4	1
Live births weighed	16	2	8	3	7	1	3	4	1
%	100	100	100	100	100	100	100	100	100

FULL IMMUNISATION RATE UNDER 12 MONTHS

Full Immunization Under 1 year Against Estimated Livebirths

% PP STERILISATION TO TOTAL FEMALE STERILISATION

Boudh, Cuttack and Puri districts shows very less post-partum sterilization against total female sterilization.

% MALE STERILISATION TO TOTAL STERILISATION

18 districts showing less than 1% for Male sterilization against total sterilization

% IUCD AGAINST TOTAL FP + IUCD

Malkangiri, Gajapati, Sonapur and Rayagada districts show only 41, 44, 45 and 49% respectively for IUCD against total FP methods including permanent plus IUCD.

SCORING OF DISTRICTS FOR SERVICE DELIVERY (16 KEY INDICATORS)

Each district has scored for each life stage based on 16 key service delivery indicators. It will be appropriate to look into the scoring of each district for each life stage so as to do interventions which are information based.

The following districts showing poor score for pregnancy care, Child birth, Post Natal & Newborn care and Reproductive age group

DISTRICTS OF ODISHA WITH POOR SCORING FOR 16 KEY INDICATORS				
PREGNANCY CARE (5 INDICATORS)	CHILD BIRTH (3 INDICATORS)	PNC & NEWBORN CARE (5 INDICATORS)	REPRODUCTIVE AGE GROUP (3 INDICATORS)	OVERALL (16 INDICATORS)
BOLANGIR	NABARANGAPUR	GAJAPATI	SONAPUR	RAYAGADA
KHORDHA	BOUDH	KENDRAPARA	BHADRAK	GAJAPATI
NABARANGAPUR	MALKANGIRI	RAYAGADA	CUTTACK	KORAPUT
RAYAGADA	JAJAPUR	CUTTACK	GANJAM	MALKANGIRI
KORAPUT	KENDUJHAR	GANJAM	MALKANGIRI	NABARANGAPUR
GAJAPATI	KORAPUT	MALKANGIRI	KENDRAPARA	BOLANGIR
BOUDH	DEBAGARH	KHORDHA	BARGARH	GANJAM
GANJAM	RAYAGADA	KORAPUT	BOLANGIR	JAJAPUR
NUAPADA	KENDRAPARA	SAMBALPUR	DEBAGARH	KENDRAPARA
BALASORE	NAYAGARH	SONAPUR	GAJAPATI	SONAPUR

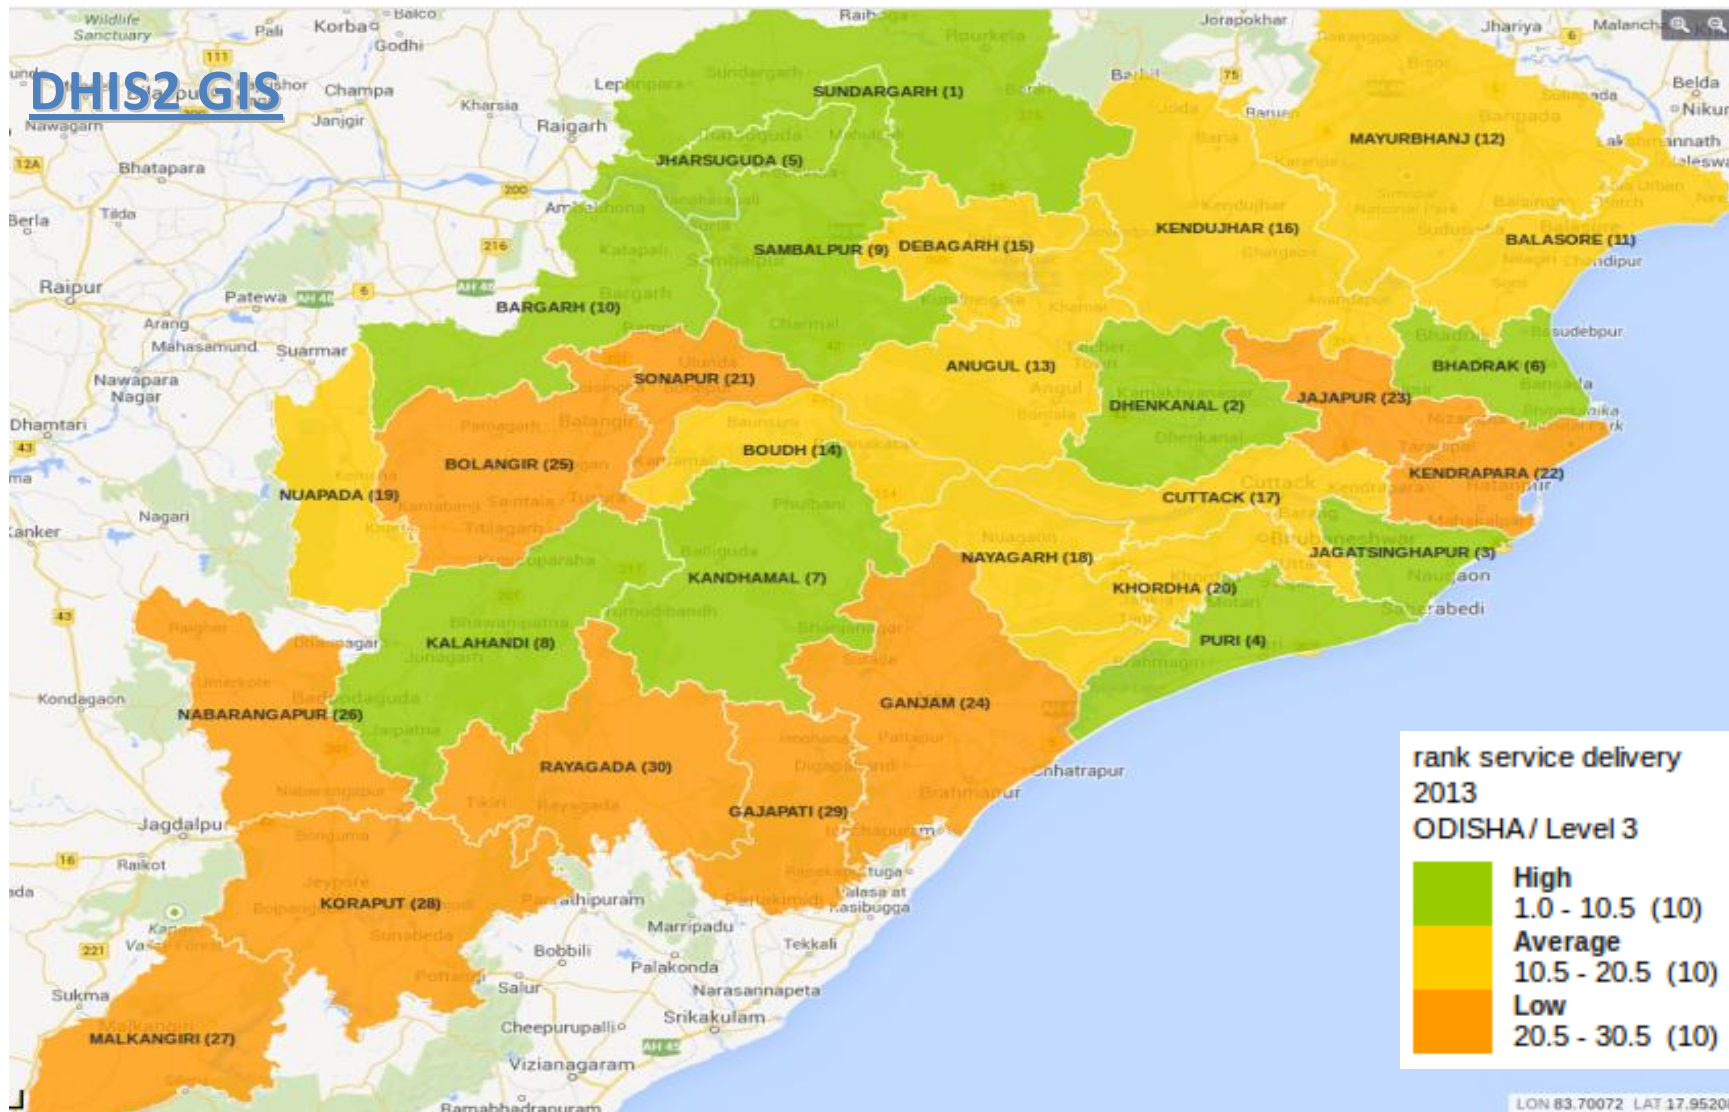

The Districts listed for Pregnancy care, Child birth, PNC & Newborn care and Reproductive age group need intervention for their respective focus life stage. When the scores for each life stage has aggregated for each indicator and based on overall scoring, the districts shown poor scoring in all the life stages is listed under overall (column 5) of Table above. The table shows the shows poor scoring districts from above downwards.

RANKING OF DISTRICTS FOR SERVICE DELIVERY (16 KEY INDICATORS)

RANKING OF DISTRICTS OF ODISHA BASED ON 16 KEY INDICATORS 2013							
DISTRICTS	PREGNANCY CARE	CHILD BIRTH	PNC & NEWBORN CARE	REPRODUCTION AGE GROUP	TOTAL SCORE	Z SCORE	RANKING

SCORING OF DISTRICTS FOR HEALTH FACILITIES PERFORMANCE

Each district has scored for each health facility type based on 41 key indicators. It will be appropriate to look into the scoring of each district for each health facility type so as to do interventions which are information based.

The following districts showing poor score for SCs, PHCs and CHCs

DISTRICTS OF ODISHA WITH POOR SCORING FOR HEALTH FACILITIES PERFORMANCE			
SC (8 INDICATORS)	PHC (15 INDICATORS)	CHC (18 INDICATORS)	OVERALL (41 INDICATORS)
CUTTACK	PURI	KHORDHA	PURI
JAGATSinghapur	JAGATSinghapur	PURI	KHORDHA
PURI	KHORDHA	BOUDH	BOUDH
GAJAPATI	BOUDH	MALKANGIRI	CUTTACK

SAMBALPUR	NAYAGARH	MAYURBHANJ	BARGARH
NABARANGAPUR	BARGARH	BARGARH	MAYURBHANJ
KALAHANDI	MAYURBHANJ	KALAHANDI	GAJAPATI

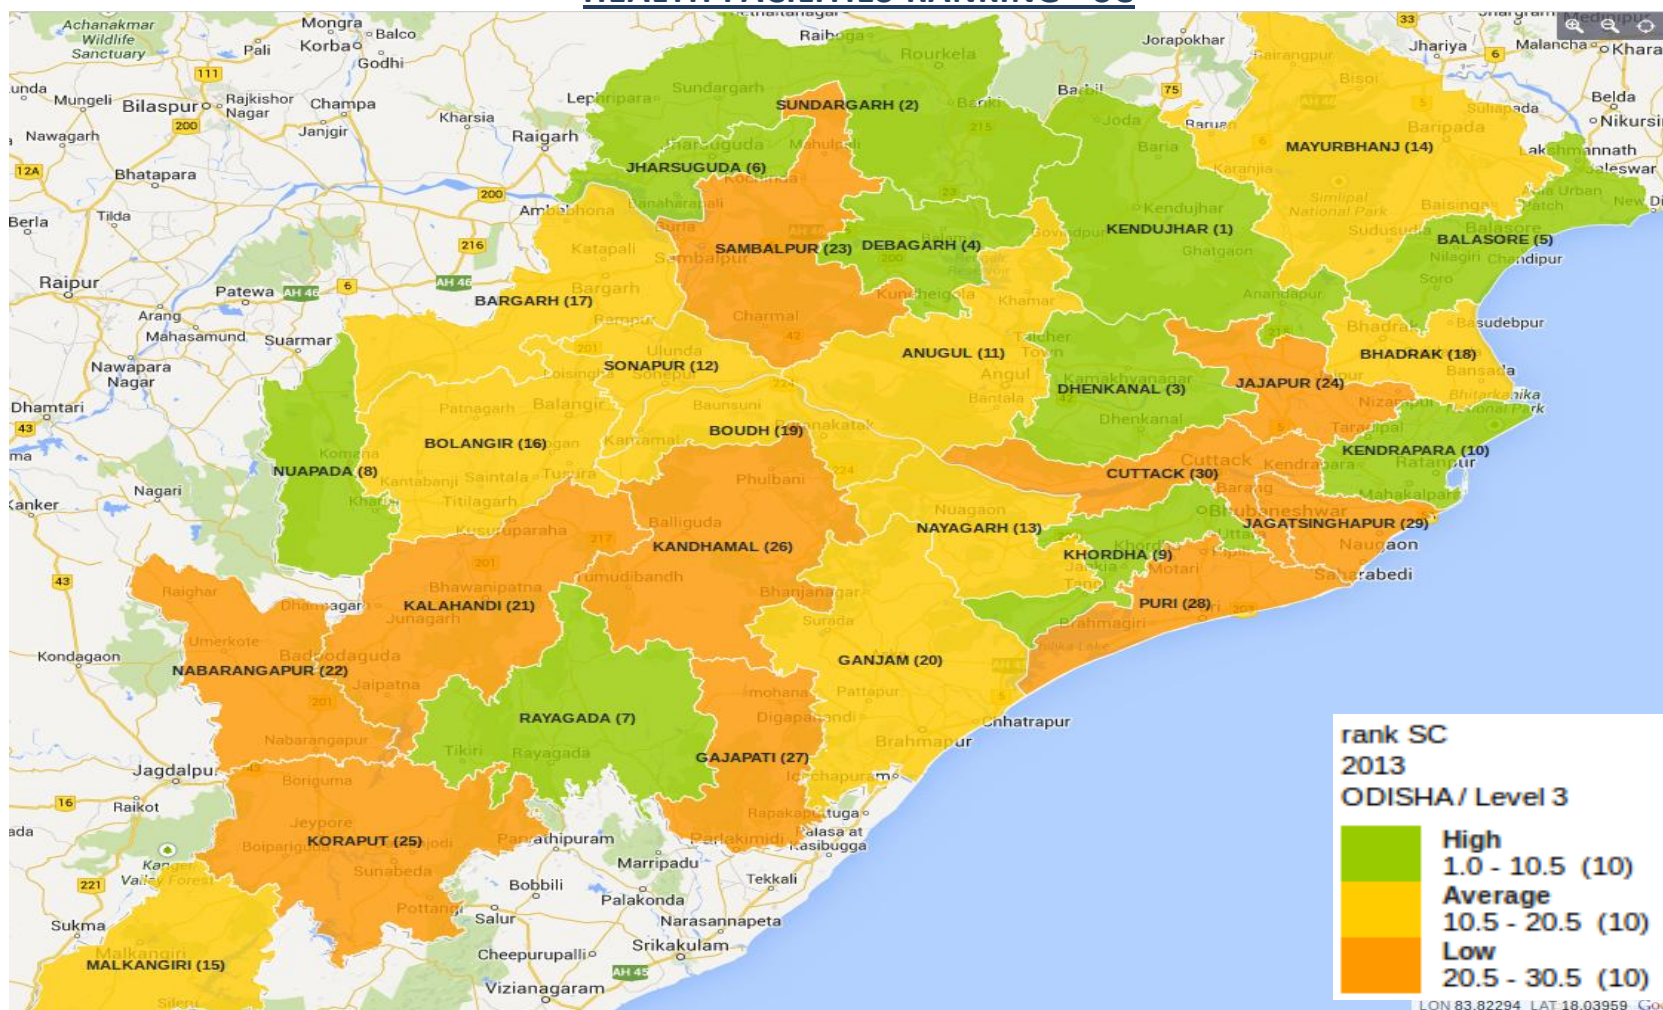

The Districts listed for Performance of health facilities for SCs, PHCs and CHCs need intervention for their facility type. When the scores for each facility type has aggregated for each indicator and based on overall scoring, the districts shown poor scoring in all the health facility type is listed under overall (column 5) of Table above. The table shows the shows poor scoring districts from above downwards.

SCORING OF DISTRICTS FOR ACCESS TO HEALTH CARE

Each district has scored for access to health care based on 7 key indicators. It will be appropriate to look into the scoring of each district for access to health care so as to do interventions which are information based.

The following districts showing poor score for access to health care

DISTRICTS OF ODISHA WITH POOR SCORING FOR ACCESS TO HEALTH CARE

HEALTH CARE ACCESS (7 INDICATORS)
KHORDHA
KORAPUT
CUTTACK
NABARANGAPUR
SAMBALPUR
BOUDH
MAYURBHANJ
RAYAGADA
NAYAGARH
BALASORE

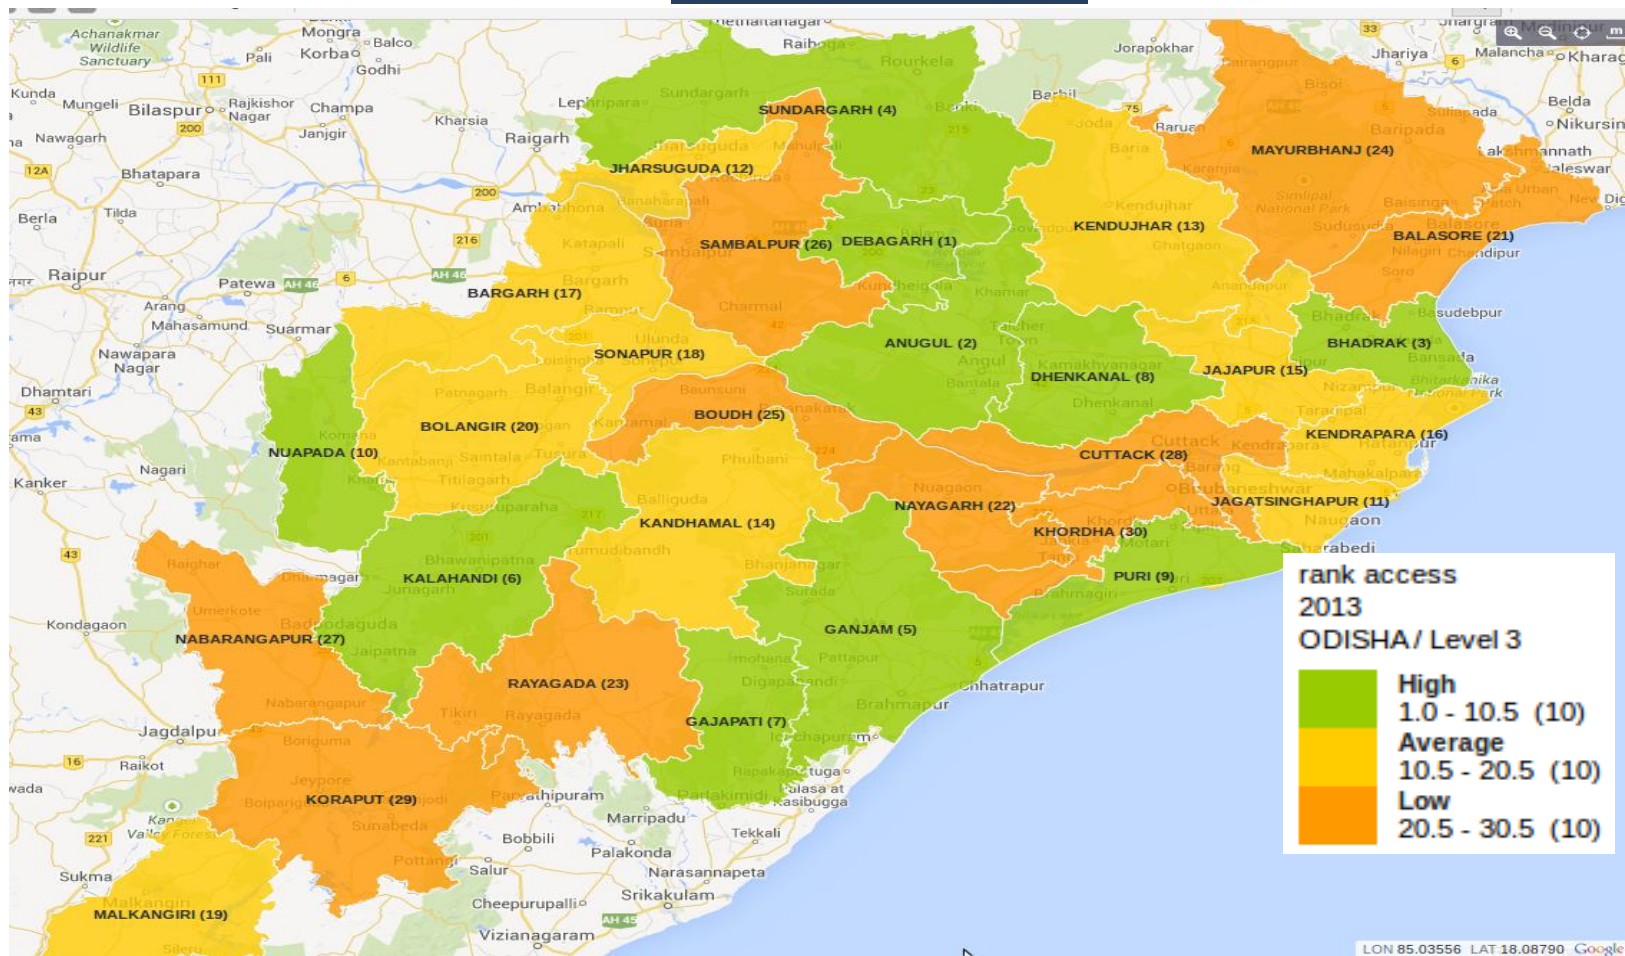

The Districts listed for Performance for health care access need intervention. When the scores for each district has aggregated for each indicator and based on overall scoring, the districts shown poor scoring for health care access is listed in Table above. The table shows the shows poor scoring districts from above downwards.

DISCUSSION

The Odisha state has shown overall progress in Health Management Information Systems in terms of reporting, data completeness, data timeliness and service delivery. The coverage and quality of service delivery has been shown improvement in 2013. In Odisha, facility wise data entry has been processed since Oct 2010 and there is significant increase in data reporting of health facilities since Apr 2011.

About service delivery, there is significant increase in access to antenatal care services and delivery services in 2013. The indicators for coverage and quality of antenatal care services have shown improvement when compared with previous year.

The percentage of pregnant women registered for Ante-Natal care services are increased by 9% from 42% in 2012 to 51% in 2013 which shows the awareness among the population and increased access to ante-natal care services. Sonapur, Debagarh, Jharsuguda and Ganjam districts show 19, 28, 28 and 30 and when we drill down to Sonapur districts, Dunguripalli Block shows very less % for ANC registration in 1st trimester rate.

In case of mortality, the infant mortality rate for Odisha is 18 per 1000 live births. The reporting of infant deaths has improved in the state. In 2012, the districts of Odisha have reported less than 10 infant deaths per 1000 live births.

DISTRICT	IMR	PERINATAL MORTALITY RATE
NUAPADA	54	85
NABARANGAPUR	48	74
MALKANGIRI	42	59
KALAHANDI	38	57
BOUDH	35	53
BOLANGIR	33	49
KORAPUT	32	46

In case of maternal mortality ratio (MMR), Odisha shows 108 Maternal deaths per 100,000 live births and there are 16 districts reported more than 100 maternal deaths per 100,000 live births and these districts need to be focused for further improvement in pregnancy and delivery care services.

DISTRICTS	INFANT MORTALITY RATE	MATERNAL MORTALITY RATIO
DEBAGARH	22	536
BOUDH	35	395
BARGARH	30	294
NUAPADA	54	235
MALKANGIRI	42	227
NABARANGAPUR	48	222
KANDHAMAL	28	200
SONAPUR	25	196
KALAHANDI	38	189
BOLANGIR	33	186
SUNDARGARH	22	172
MAYURBHANJ	23	122
GAJAPATI	10	121
KORAPUT	32	119
KENDUJHAR	21	119
BALASORE	19	118

RECOMMENDED ACTION

Ante-Natal Care

Improved access to Ante-Natal care services is a good sign of improvement and there should be improvisation of quality of Ante-Natal care services in terms of identifying high risk pregnancies at the earliest and treat or refer to higher facilities. The State should ensure that every pregnant woman should have received quality in ANC check up like examination, blood pressure, blood test for hb. The report has provided the number of health facilities district-wise who are not reported any case of ANC hypertension new case, Hb tested and ANC registration from Apr to Oct 2013 and we recommend the state have to act upon these facilities which are not reported above mentioned services to pregnant women. The percentage of pregnant not availed any services is estimated as 16% for Odisha in 2013. Boudh, Sonapur, Cuttack and Khorda shows 42%, 35%, 30% and 29% pregnant women not availed any ante-natal care services which can further enquired for social or geographical barriers for access to ANC.

Reporting Issues in ANC coverage

The state needs to check if there are any reporting issues for ANC TT2/ Booster coverage and ANC third visit. We have observed similar figures for both of the data elements by some of the health facilities and also when checked with reported figures it shows quite high % for Boudh, Sonapur and Cuttack districts. When the same districts are checked with estimated pregnancies it shows very less % for coverage of ANC services.

Delivery Care

The State has shown improvement in % of institutional delivery which is 88% in 2013 and it has increased by 1% from 87% in 2012. The percentage of delivery by SBA has also increased by 1% and the home delivery has decreased from 18% in 2011, 16% in 2012 and 12% in 2013. The percentage of unreported delivery for Odisha is estimated as 21%. Boudh, Puri, Nayagarh, Sonapur and Khorda districts shows high % for unreported deliveries which is 52%, 49%, 41%, 40% and 31% respectively. Gajapati district shows 52% institutional deliveries against total ANC registered and when we refer ANC registration against estimated pregnancies, it shows 104 % and it implies that there is more % of unreported deliveries in Gajapati. Most of the deliveries in Kasinagar CHC of Gajapati districts are reported as complicated pregnancies. It needs to be enquired whether they are all complicated pregnancies or reporting issues. VSSMC. Burla of Sambalpur districts has not reported any complicated pregnancies attended from Apr to Oct 2013. Angul district shows only 2% for caesarean section delivery rate and the state's average is 10% and it should be enquired for very less % c-sec reported. 92% of institutional deliveries are discharged under 48 hrs of delivery in Boudh district and it needs serious attention, if most of the institutional deliveries are discharged under 48 hours when GOI says it is mandatory for women should stay atleast 48 hrs after delivery for normal as well as c-sec delivery.

Post-Natal & Newborn Care

The state shows 94% for Newborn breastfed within 1 hr and it has increased by 1% when compared with previous year. About 30% of Home deliveries in Odisha have not reported to have newborn visited within 24 hours of delivery. Jajapur district shows only 43% of home deliveries where newborn visited within 24 hours. Blocks of Jajapur districts shows very less percentage for home delivery newborn visited within 24 hrs rate and it needs to further enquired why it is not happening. Boudh, Sonapur, Koraput, Khordha and Cuttack districts shows 63, 67, 70, 71 and 72 % respectively for full immunized child less than 1 year against estimated live births.

Reporting Issues for Low birth weight babies

Khandamal district shows 26% for low birth weight babies (less than 2.5 kgs) and SCs of Daringibadi Block has reported more LBW babies and this may be due to reporting issues.

Family Planning Services

Boudh, Cuttack and Puri districts shows very less post-partum sterilization against total female sterilization. In Odisha, 18 districts showing less than 1% for Male sterilization against total sterilization. Malkangiri, Gajapati, Sonapur and Rayagada districts show only 41, 44, 45 and 49% respectively for IUCD against total FP methods including permanent plus IUCD.
